CSE 430 Fall 2011 #71421 Operating Systems
1st Homework Assignment, Due on Thursday Aug 25th, 5:00pm.
This is an individual assignment. Total points 110. Perfect score 100.

The purpose of this assignment is to learn how to get information about particular topic from internet, books or any other information sources, how to eliminate irrelevant information and how to put important stuff it in compact manner. This is a research assignment. It requires two pages of technical information on following two topics.

1. Write a two-page paper about what virtualization in Operating Systems is, what types of virtualization technologies there are, and argue how an OS hardware abstraction feature relates to a virtual machine. (55 points)
2. Write a brief history of Operating system. Mention the name of the first Operating system. (55 points)

Important points to be included in the write-up apart from technical details:
1. Take information from various resources and write it in your own words.
2. Assignment should show the clear understanding of topic.
3. More than one quoted lines are not accepted.
5. List down the references at the end of each topic write-up.
6. Critic of references.
7. Write how you find the particular information.
