Send your report to the TA (su.kim@asu.edu) and submit hardcopy at the beginning of the class. Remember the goal of the Phase I report is to identify a precise problem to work on in the Phase II and III. Refer to the Course Syllabus for description of Phase II and III. The report should be written in a technical style using good English. All referenced sources should be cited. The report should provide answers to the following questions:

1. What was your initial goal and motivation to do a survey in topic area you selected?
2. What have you learnt regarding the state-of-the-art in your selected topic area?
3. According to your understanding what are some of the most important problems that need to be solved in your selected topic area?
4. What is the tentative problem description for Phase II of your project? And what are your tentative plans for the Phase II?
5. The reference to paper you are going to present to the class.

The report should be cohesive and need not be very long. Brief reports are preferred over verbose reports. The report should reflect your understanding rather than trying to provide summary of all the papers you read for the report. As a guideline try to restrict your reports to 3 pages (Minimum 10 point font, excluding citations).
