Chapter 1

Context - cause - capacity

- Example is form of causality
- Communication is form of causality
- Causality - communication

1. Resource peer
   - More influence
   - Less reliance
   
2. Peer network
   - Change

3.Dyn. eq.

Characteristics of Mobile/Senior Node.
1. What is the process step?
2. Prepare the plate.
3. Load your sample from solution + detergent + buffer.
4. Add enzyme + EDC + activated 90min.
5. Feed into punchdown to 90%.

[Diagram of a process flowchart with labeled steps]

- What are the key stages of the process?
- Are there any critical points to monitor?
Service Discovery
- Ads (Commodity)
- Adapters
- Host Name
- Middleman

FTP C.H.S 140
- Performance & Efficiency
- Security
- Device Security
- Platform independence (AVIT)
- Ability to exploit
- Dynamic Process Spread & HA
- Anticipate Features (Concurrent)
- Orchestrate OS & Communication
- Support heterogeneous devices
- Security
- Lifecycle

How do we all impact OS?
