UNIX Semantics: File exists means it can be programmed close

```
read (fd, buf, n)
```
If the index number of a blocked file is read, the file would become sharable in NFS from version 4.2.

The design would become simpler if the

This many read to increased file.

If a child will get processed, file clean.

NEF since same num will not produce.
A: you. Compactly describes? - You yourself doesn't report being by you anymore?
Two generals consensus problem

- In presence of a majority, proceed to consensus.
- A finite step (success)

If 3+ imperfection do your attack at to it be successful and if 5

Attack at to it be successful and if 5

- Attack will be successful only if 5

- Capable/robust

- How to handle errors. Error-free setting

- Communication: use any message: when

- 2 < 2 coordinate after the time.

- Enemy
In each block - 

mod function time

by

Can be performed at local R/W speed 

Very good for part - r/w

Client

6 write and done locally of LA

This assumption fails all the read

Header

Send all the written blocks to LA

Open close file

Implementation: 9 close to open resource
